[Civilization 5 Patch 1.0.3.279 Download](#)

Ford:
The choice of Henry Ford as the deity-like figure in Huxley's dystopia reveals the new world's value system. Henry Ford was famous for the perfection of mass production and the assembly line. In Huxley's world, even humans are mass-produced and grown with the help of, yes, that's right, an assembly line. Efficiency, production, and consumerism are the most important values here; not morality, compassion, or piety.

Bottles:
Bottles are introduced in Chapter One as the new way in which humans are created and grown. Right off the bat, this just seems very wrong. But far more disturbing than the notion of little zygotes inside bottles is the notion of full-grown humans being similarly trapped. Now we're in the realm of the metaphor. Of course, Huxley being Huxley, we're told directly that this is what he's going for in Brave New World. Look at Mustapha's words in Chapter Sixteen:

"Even after decanting, (man is) still inside a bottle – an invisible bottle of infantile and embryonic fixations. Each one of us, of course,..... goes through life inside a bottle."

Brave New World: Allusions and Unique Terms:
In his fictional novel Brave New World, Huxley makes many **allusions**, or references to real-life people, places or concepts. But he also invents his own terminology, and there are many new terms and concepts with which we should become familiar before reading and for reference as we read the novel.

Character/Concept	Allusion to
Bernard Marx	Karl Marx, founder of Marxism, Socialism
Lenina Crowne	Russian revolutionary and founder of the communist party Vladimir Lenin
Benito Hoover	Combination of Italian dictator Benito Mussolini and Herbert Hoover-31st American President during the Depression; known for "Hoovervilles" or shanty towns where homeless and unemployed people lived.
Malthusian belt, Malthusian Drill	Political economist Thomas Malthus, an early proponent of birth control for population regulation
conditioning and Neo-Pavlovian	Russian scientist Ivan Pavlov and his conditioning experiments (Pavlov's dogs)
Ford	Henry Ford, creator of Model T Ford and modern assembly-line work
